

You name it.

We can do it.

Tender

Tender is another opportunity for you to create a competitive situation without stating a listing price. You set the terms, conditions and the deadline and prospective buyers have the opportunity to put forward their most competitive offer. Offers can be subject to conditions and do not have to be unconditional like at an auction. When you offer your property for sale by Tender everyone with an interest to purchase must seal their offer (tender) in an envelope and deposit it with us by a predetermined date and time. All tenders are then opened together allowing you to choose and/or negotiate with the one most favourable to you. The date may not be changed.

Deadline Sale

A Deadline sale is similar to a tender however not as formal. It is a highly effective method of bringing one or more offers to a head for you to view. Because Deadline sale is another method of marketing without a price it can increase the number of enquiries, inspections and opportunities assisting in obtaining the very best price for your property. Often Multi-offer situations can arise which is a process of a purchasers being informed that they must put their best offer forward. Marketing is usually accompanied by Unless Sold Prior and the date and time may be changed should you receive an early offer.

Exclusive Listing

When you list exclusively, you put your trust in one organisation and that agency takes on sole responsibility for the sale of your home. At Harcourts, we make sure we earn your trust before we ask you to list exclusively with us and we make sure that we fulfil our responsibilities. It's a promise Harcourts are proud to deliver.

No Price* - this method invites buyers to negotiate with you upwards of your market expectation without a price barrier. Buyers will see your property and decide what they are willing to pay. This method of marketing can attract 2-3 times the number of potential buyers.

*Recommended for 2-3 weeks.

Priced - the property is marketed at a price that is acceptable to the seller. When marketing with a set price it is extremely important to determine the right figure from the start. Overpriced properties take longer to sell and do not attract the optimum number of potential buyers to create competition.
